STRATA ENERGY SOLUTIONS

Reduce your building's energy bill by up to **77%**

About Wattblock

Wattblock is working to reduce electricity bills and energy consumption in Australia.

Wattblock has assisted over **600** strata buildings across Australia to mobilize on energy saving initiatives. To date we have identified over \$25m of annual energy waste across townhouses to high-rise residential skyscrapers.

Running energy saving projects in the common area of apartment buildings, Wattblock has helped reduce energy costs by an average of 56% for its customers.

Our products and services

Let Wattblock find the best energy efficiency projects for you to run in your building.

We will estimate the costs of the projects, potential energy savings, get quotes, and calculate the payback period for each project.

“Wattblock has helped us save 77% off our communal energy costs. This was the first year on record that we didn't raise our strata levies! Thank you Wattblock”

- Stanley Hui, Chairperson of Owners Corporation

Wattblock awards

Who is Wattblock?

Wattblock was started by Brent Clark, chair of a strata with a background in energy consulting to AGL. He is joined by Ross McIntyre in data analysis, Scott Witheridge environmental engineer, Peter Langley, energy industry analyst, and a team of low carbon and solar experts.

Are Wattblock's electricians licensed?

All electricians engaged by Wattblock have been licensed in the states in which they operate.

What is Wattblock's mission?

The energy wasted in Australia's strata buildings has a bigger impact on carbon emissions than the cars driving on the roads. Wattblock aims to crowdsource the achievement of Australia's national carbon emission reduction target.

Where is Wattblock located?

Wattblock is located at River City Labs in Brisbane, and UNSW Innovations in Sydney.
