

Case Study – Solar and Batteries

A multi-tenant university housing complex installs solar and batteries

Challenges

- A housing co-operative wanted to lower operational costs for 8 apartments
- Tenants needed to be billed based upon their consumption

Solution

Enphase inverter and battery management system provides online reporting to co-op members

30kWp
Solar system
42kWh
Batteries

\$130,000
Capital Cost

Benefits

80%
annual electricity bill reduction

7 years
Est. payback

40 tonnes
CO2 reduced per year
